28<sup>th</sup> September 2007

Dear Mike and Steve,

I would like to take this opportunity to thank you both for your outstanding efforts in the construction management of both the new Angiography Suite and the Central Sterile Stores Department (CSSD) at the Women's & Children's Hospital.

These were two projects which we at the hospital knew were never going to be easy, but at the same time recognised that doing them separately would have been near impossible. Your professional approach to the timing and coordination of building activities between the two floors has resulted in an end product for both areas that more than meets our expectations, and will become truly functional and pleasant environments for our staff to work in.

I would particularly like to commend Steve on his patience and good nature amidst often trying circumstances, and working with subcontractors who sometimes failed to perform up to expectations. Steve was also proactive in suggesting solutions to any problems that arose rather than simply complaining about them.

It's been great working with both of you through the 22 long weeks of construction, and I look forward to the next opportunity we have to work together.

John Davey  
Senior Project Officer  
Facilities Planning & Management
